PROFESSIONAL SUMMARY

Dynamic Full Stack Web Developer adept at utilizing HTML, CSS, JavaScript, Node.js, and React.js to create scalable web applications. Skilled in RESTful API design, MongoDB queries, and collaborative workflows using Git. Quickly adapts to new technologies and I focus on writing clean, efficient code and continuously strive to improve my skills. I thrive in challenging environments and enjoy finding innovative solutions to complex problems.

PROJECTS

1. BigBasket Website | ⊕ | ⊚
React | JavaScript | Git | HTML5 | CSS3 | Node.js | Responsive Web Design | Redux

- Developed a fully functional grocery store replica with React.js and Node.js.
- Implemented features like SignIn/SignOut, Add to Cart, Remove from Cart, and Payment Page.
- Utilized Redux for state management and ensured the application was fully responsive.
- Handled RESTful APIs to perform CRUD operations and enhance user experience.
- Independently managed the project, displaying strong problem-solving skills.

2. youtube clone website | ⊕ | ⊚
HTML5 | CSS3 | JavaScript | React | RESTful APIs | Git | Responsive Web Design

- Created a responsive and user-friendly clone of YouTube using React.js.
- Implemented features like video playback, filtering, and sorting to enhance user experience.
- Integrated RESTful APIs for seamless data fetching and real-time updates.
- Ensured the application was fully responsive and optimized for various devices.
- Developed independently, showcasing JavaScript proficiency and front-end skills.

3. Bewakoof Clone Website | ⊕ | ⊚
HTML5 | CSS3 | JavaScript | Git | Responsive Web Design

- Designed and implemented a responsive and user-friendly fashion e-commerce website using HTML5, CSS3, and JavaScript.
- Developed and integrated essential features such as user authentication, login/signup, and a wishlist.
- Implemented slide card and dropdown functionalities to enhance user interaction and navigation.
- Ensured cross-browser compatibility and optimized website for various devices and screen sizes.
- Used Git for version control and managed the project development independently within 5 days.
